

Bug Report-TaskFlow

Fields	Details
Bug ID	BUG_LOGIN_001
Title	Login validation does not indicate that email and password is required when both fields are empty
Environment	TaskFlow/Windows11/Microsoft Edge/Desktop
Module	Login
Status	Open

Steps to reproduce

1. Open TaskFlow login page
2. Leave both the email and password field empty
3. Click sign in button
4. Observe the result

Expected Result

When both fields are empty, the application should clearly inform the user that both email and password are required, or give a clear validation for each missing field.

Actual Result

User gets an error message: Invalid username or password

Evidence

The image shows a login form for 'TaskFlow', a QA Internship Practical Application. The form is centered on a light blue background. It features a dark blue header with the 'TF' logo and the title 'TaskFlow'. Below the header, there are two input fields: 'Email' with the placeholder 'name@example.com' and 'Password' with the placeholder 'Enter password'. A red error message 'Invalid email or password.' is displayed below the password field. A dark blue 'Sign in' button is positioned below the error message. At the bottom of the form, there is a light blue box containing 'Exam accounts' information: 'QA User: intern@example.com / Intern@123' and 'Viewer: viewer@example.com / Viewer@123'. A link 'Reset demo data' is located at the very bottom of the form.

Enter password

Invalid email or password.

Sign in

Exam accounts
QA User: intern@example.com / Intern@123
Viewer: viewer@example.com / Viewer@123

Reset demo data

Severity

The issue does not prevent the user from logging in, but the validation feedback is wrong and may cause confusion

Priority

The issue affects the login experience but does not completely prevent the users from correcting their input

Fields	Details
Bug ID	BUG_STATUS_001
Title	Status filter does not work correctly when choosing done
Environment	TaskFlow/Windows11/Microsoft Edge/Desktop
Module	Status
Status	Open

Steps to reproduce

1. Open TaskFlow login page
2. Login successfully
3. Change the status to in progress
4. Observe the result
5. Again, choose the status to done
6. Observe the result

Expected Result

When choosing the status done, the list of tasks should all have the status done.

Actual Result

There was also the task whose status was in progress

Evidence

 Screen Recording 2026-10-06 104848.mp4

Severity:Medium

The issue does not prevent the user from creating, editing or deleting the task, but the user may have confusion as it shows both the in progress and done tasks.

Priority: Low

The issue may create confusion among the users about the exact status of the task, but does not prevent from doing the CRUD operations.
